Twin Win

You'll never have the problem again of accidentally mixing colours and whites with the new space-saving four-in-one **LG TwinWash**. The machine has a compact design that perfectly suits Hong Kong homes, with two washers, a main and a mini, that can be run simultaneously or separately. There's no need for a separate dryer, either, as it has LG's eco-hybrid dryer function, while the TrueSteam function penetrates fabric with real steam to eliminate 99.9 percent of household allergens and odours. Plus, Wi-Fi connectivity means you can control the machine on the go! lgnewsroom.com

Eco-conscious Clothing

Environmental NGO Redress is leading the way when it comes to addressing waste in the fashion industry. A recent partnership with Miele, the **Get Redressed x Miele Clothing Drive 2017**, took place over two weeks with 4.4 tonnes of second-hand clothing and accessories collected at multiple points across the city. Redress redistributed the collected items to eight local charities as part of its mission to save more clothing from landfills. The initiative proved that, with care, all clothing can be recycled. redress.com.hk

Long Lunch

The annual Melbourne Cup Long Lunch in November by **Farmer's Market** and **Angels for Orphans** raised an impressive HK\$188,000 for projects supporting underprivileged children in Cambodia and Bali. Held for the first time at the Aberdeen Marina Club, the relaxed setting came to life with 210 glamorous guests, determined to embrace one of the biggest days in the horseracing calendar. Plans are already underway for more events in 2018. angelsfororphans.org | farmersmarket.com.hk
